

# GOLDEN TEAK — LUXURY SPECIFICATION SHEET

## Overview

Golden Teak is considered one of the world's most premium hardwoods. With its natural golden grains, exceptional durability, and high oil content, it has been the top choice for marine, luxury outdoor, and architectural projects for decades. Its beauty enhances over time, developing a deeper golden-brown patina.

## Technical Specifications

Property	Details
Density	650 – 770 kg/m <sup>3</sup>
Janka Hardness	~1100 lbf
Moisture Content (KD)	8% – 12%
Durability	Class A – Extremely resistant
Stability	Very stable, low movement

## Common Applications

- High-end Outdoor Furniture
- Marine Decking & Boat Building

- Pergolas, Gazebos & Exterior Architecture
- Luxury Doors, Windows & Frames
- Premium Interior Paneling & Joinery

## Workability

Golden Teak works exceptionally well with machinery and hand tools. It sands smoothly and accepts oil, varnish, and marine-grade finishes beautifully. Its natural oils provide long-lasting protection without chemical treatment.

## Care & Maintenance

- Apply premium teak oil annually for UV protection.
- Wash with soft brush & mild soap only.
- Store in a dry area before installation to avoid moisture absorption.
- For exterior use, apply marine-grade finish for extended lifespan.
